#	Check	Status
1	Are the model, version, quantity and due date correct?	
2	Are the correct drawing, parts list and quality checks ready?	
3	Are the PCB source, model and lot correct?	
4	Are enough usable materials ready and within their use-by date?	
5	Does the first QR scan match the correct lot in the system?	
6	Are the machine program and settings correct?	
7	Are machines ready and measuring tools checked and still valid?	
8	Are the correct tools, trays and spare parts ready?	
9	Is the machine clean and old material removed?	
10	Are the first sample checks and the person who checks it agreed?	
11	Is the plan ready to separate, repair and recheck bad parts?	
12	Are trained workers and support people available?	
13	Do we know who to call and where to send materials?	
14	Are the correct packing, labels and shipping contact ready?	
15	Are good and bad sample counts checked and open problems listed?
